What Is CoreMedia Content Cloud?

CoreMedia Content Cloud is an open, best-of-breed digital experience platform (DXP) built on an agile content management system (CMS) and advanced digital asset management (DAM) system that enables leaders in all industries to orchestrate dynamic, personalized digital experiences, and deliver them reliably, efficiently, and at enterprise scale to any channel. Marketers, merchandisers, and developers can work collaboratively and effectively on omnichannel experiences that drive engagement, increase loyalty, improve brand visibility, and boost revenue.

Truly Omni-channel

Create reusable content and assets for multiple sites, channels, regions, and languages. Improve the impact of your digital brand by previewing experiences for all channels and touchpoints right on your desktop.

Headless PLUS Content Management

All the flexibility and support that developers require to deliver content wherever it's needed, PLUS advanced tools for marketers and merchandisers to quickly edit and optimize content in context.

Personalize Every Experience

Design and launch contextual experiences across multiple channels right from your desktop with CoreMedia Studio. Simulate and preview customer experiences based on identity, region, device, language, browsing history, and more. Integrate data from all available sources including eCommerce, Marketing, and CRM tools.

Connect Everywhere with CoreMedia Integration Hubs

CoreMedia provides an open API integration architecture and connectors to a wide range of third party repositories, commerce systems, marketing platforms, and experience optimization tools. This allows your team to use the tools they're already familiar with.

Support Every Step of The Way

CoreMedia's world-class customer success team and global partner network gets you started fast, sets you up for success, and sees you across the finish line.
